Subject: Hospitalist Position (Beckley, WV)

Hello

I am a physician recruiter looking to find the right candidate for an awesome Hospitalist opportunity in Beckley, WV.

Hospitalists coordinate the care of patients in hospital and are "**captain of the ship.**" They are the physicians that organize the communication between different doctors caring for a patient, and serve as the point of contact for other doctors and nurses for questions, updates, and delineating a comprehensive plan of care. They are also the main physician for family members to contact for updates on a loved one.

o must be a U.S. citizen to qualify for this position (**will consider green card holder**).

o must submit to a drug test and receive a negative drug test before you can be appointed into this position.

o must have a certification, licensure, or registration credentials. Applicants must have a current, full, unrestricted license in a state or territory of the U. S. for this position. In some cases, these may be substituted for experience and education. **Allowance may be made for a candidate who is not available for placement within 90 days dependent on credentials of that candidate.**

If you know of anyone (or can refer me to someone who does know someone) that fits this criteria please have them call or email me at the information provided below. Thank you and have a great day!
